

PCAEA - Most Repeated Questions (2021–2024)

Question	Repeated	Marks
List out the attributes of a file.	2	2
What are the advantages of unix?	2	2
What is time sharing system?	2	2
Define bit map and bit vector.	1	2
Define cpu scheduling.	1	2
Define disk scheduling.	1	2
Define instruction register.	1	2
Define interrupt.	1	2
Define mutual exclusion.	1	2
Define operating systems.	1	2
Define privileged instruction.	1	2
Define process synchronization.	1	2
Define single threaded process.	1	2
Define system boot.	1	2
Define system call.	1	2
Define the term swapping.	1	2
Define the term - inter-process communication	1	2
Define the term - operating system.	1	2
Define the term - swapping.	1	2
Define thread.	1	2
Define time sharing.	1	2
Distinguish between internal and external fragmentation.	1	2
Expand man.	1	2
Expand worm.	1	2
Explain distinguished features of time sharing system.	1	2
Give a brief on network file systems.	1	2
Give any two design principles of unix.	1	2
Give short notes on deadlock characterization.	1	2
Highlight the generations of windows operating system.	1	2
List any four types of file.	1	2
List any two important responsibilities of operating systems.	1	2
List out the characteristics in deadlock.	1	2
List out the characteristics of deadlock.	1	2
List out the conditions on deadlock.	1	2

List out the operating system services.	1	2
List out the process states.	1	2
List out the purpose of paging.	1	2
List out the scheduling algorithms.	1	2
List out the types of scheduling algorithms.	1	2
List the two types of operation.	1	2
List the types system calls.	1	2
Mention various scheduling criteria.	1	2
Specify types of system directories.	1	2
State the use of file table.	1	2
What are system calls?	1	2
What are the advantages of distributed operating system?	1	2
What are the allocation methods of a disk space?	1	2
What do you mean by best fit, first fit and worst fit?	1	2
What is a process?	1	2
What is called multiprogramming?	1	2
What is called semaphores?	1	2
What is demand paging?	1	2
What is known as paging?	1	2
What is mean by circular wait?	1	2
What is mean by fcfs?	1	2
What is meant by distributed system?	1	2
What is meant by encryption?	1	2
What is meant by inter-process communication?	1	2
What is meant by process synchronization?	1	2
What is meant by secondary storage management?	1	2
What is meant by thrashing?	1	2
What is the difference between safe state and unsafe state?	1	2
What is the process involved in deadlock.	1	2
What is the use of exec system call?	1	2
What is the use of fork system call?	1	2
Write a note on encryption.	1	2
Write a short note on linux network services.	1	2
Write down the generations of windows operating system.	1	2
Write the code for producer- consumer problem.	1	2
Write the difference between job-scheduling and cpu-scheduling	1	2
Write the generations of windows operating system.	1	2
